DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 8, 10, 11 and 13, drawn to a procoagulant-active FVIII protein and a pharmaceutical composition comprising the protein.

Group II, claim(s) 5-7, 9, 12 and 14-16, drawn to a nucleic acid molecule, nucleic acid constructs and a method for making a protein by recombinant means.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The protein in Group I has a different structure and function as the nucleic acid molecule in Group II as the protein may be used as a procoagulant while the nucleic acid molecule may be used to encode a protein. Further, the protein of claim 1 is obvious over the prior art. Marquette et al. (J. Biol. Chem. 270:10297-10303 (1995); cited in the specification, p. 4, line 9) teach that the region from residues 291-309 is a hydrophobic cluster with a high affinity BiP binding site (Fig. 5, p. 10302, col. 1, last para. and p. 10303, col. 1, 1st para.). Marquette et al. also teach that the inefficient secretion of Factor VIII correlates with BiP-binding (p. 10297; col. 2, last para.). Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to cause a mutation at Phe309 alone in addition to mutations at any other residue within this known hydrophobic cluster to increase secretion. As the groups lack a common, novel inventive step, Group I and II lack unity of invention.

A telephone call was made to DeAnn Smith on July 8, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1653

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
